

TPE HL AC-evo

Handling of Special Loads

 Capacity (kg): from 5 to 20 tons  Lifting Height (mm): 200 or higher lifting on demand

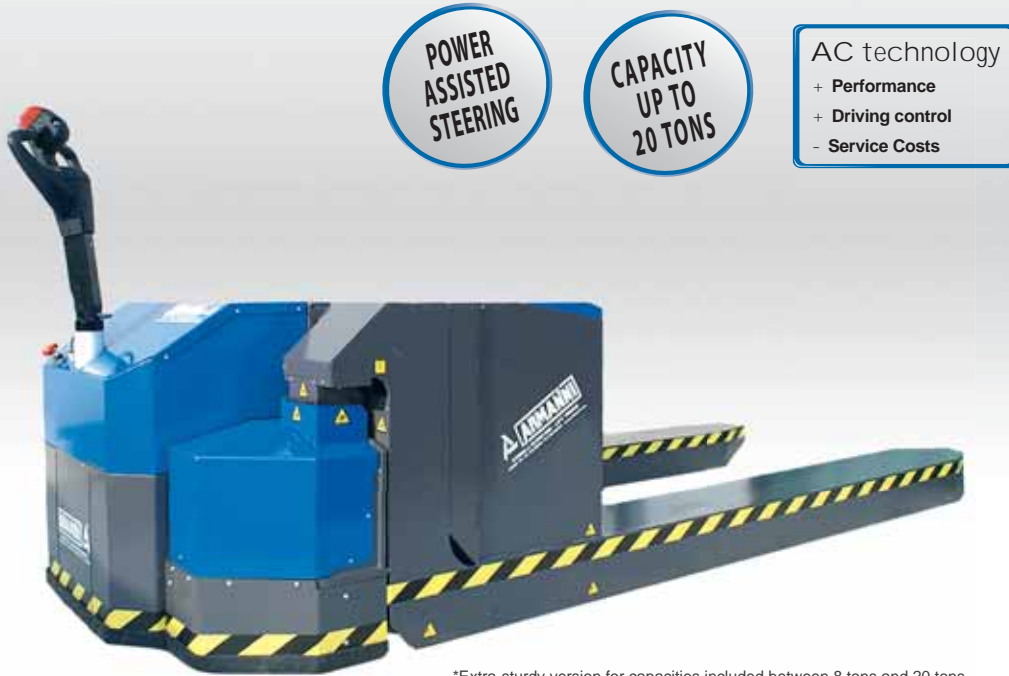

*Compact version for capacities up to 7 tons

TPE HL AC-evo

Extra heavy duty electric pallet truck for safe and easy handling of loads with extreme weights and large dimensions.

Equipped with powerful 24 V or 48V traction motors, power assisted steering and electrohydraulic lift system for loads to 20 tons.

*Extra-sturdy version for capacities included between 8 tons and 20 tons

Custom Equipment:

The length, width and lifting height of the forks on HL pallet trucks, as well as the overall machine dimensions, are defined according to the specific size and weight of the loads to be handled.

TPE HL is the ideal solution for handling heavy and bulky loads in cargo areas of harbours, railway stations and airports, as well as the metal products industry for handling moulds and raw materials.

SPECIAL PALLET TRUCKS

Features in detail: _____

DRIVING AND TRACTION:

Power assisted steering and AC traction motors offer maximum power, fast acceleration and safe braking, as well as easy maneuvering in small work spaces.

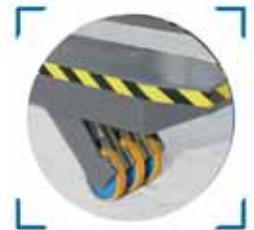

LIFTING POWER:

Special "small mast" design with double lateral pistons lift up to 20 tons.

BATTERY REPLACEMENT:

Optional roller bed system enables battery changes in minutes for minimum downtime in applications requiring continuous use.

MAXIMUM STABILITY:

Triple rollers on the side of the forks evenly distribute loads on high capacity machines.
